For: IMPROVED STORAGE WRAP MATERIAL

PRELIMINARY AMENDMENT PURSUANT TO 37 CFR 1.111

Assistant Commissioner for Patents  
Washington, D.C. 20231

Dear Sir:

Please amend the above-identified application as follows.

In the Claims

Please add new claims 41-86.

A 1 41. A storage wrap material comprising: a sheet of non-porous material having a first side and a second side, said first side comprising an active side exhibiting an adhesion peel force after activation by a user that is greater than an adhesion peel force exhibited prior to activation by a user, wherein said sheet of material is linerless, such that activation of said active side requires no removal of components of said sheet of material, said sheet of material being sufficiently flexible to conform readily to a desired surface and having sufficiently small resiliency that it does not exert undue restorative forces that would tend to cause said sheet of material to break contact with such a desired surface.

2 42. The storage wrap of Claim 41, wherein said active side is activatable by an externally applied force exerted upon said sheet of material.

3 43. The storage wrap of Claim 42, wherein said active side is activatable by a compressive force.

4 44. The storage wrap of Claim 43, wherein said compressive force is required to be at least about 0.1 psi to activate said active side.
